

Intelligent Mobile Device Management from Vandercom, supporting your business growth

Advances in mobility have enabled businesses to become more productive as the number of employees working remotely increases, yet with this added flexibility, businesses can often feel that there is a loss of control.

Now you can take control of your business-critical data on your company smartphones and tablets with our Mobile Device Management solution. Our solution keeps you connected to your mobile employees and in control of any sensitive information carried on mobile devices.

IBM MaaS360 is the fastest and most comprehensive way to configure devices for enterprise access and secure corporate data on smartphones and tablets – all from a single screen. As a fully-integrated cloud platform, **MaaS360** simplifies mobile device management (MDM) with rapid deployment, visibility and control that spans across mobile devices, applications and documents.

- ✓ Monitor Staff activity, giving you peace of mind
- ✓ Set reports on staff usage, see insights by times and days
- ✓ Black List / White List Mobile Apps, helping control for business use
- ✓ Keep tight control of expenditure, getting alerts on usage
- ✓ Remote Wipe a device or selective information, controlling important company data.
- ✓ Enforce password access
- ✓ Track employees and add Geo Fencing, getting alerts reporting to you
- ✓ Assistance with GDPR and MiFID II initiatives – encryption, secure data storage, auditing and threat management

From £2.50 per device per month, on an open flexible monthly term

Mobile device essentials:

- SMS, email or URL over-the-air (OTA) enrolment
- Passcode and encryption enforcement
- Email, VPN and Wi-Fi profiles
- Device restriction settings
- Remote locate, lock and wipe (full and selective)
- Jailbreak and root detection
- Policy updates and changes
- Compliance reporting

Complete mobility management:

- Email access controls
- Corporate directory integration
- Certificate management
- Privacy settings
- Personal policies specific to users, not devices
- Automated compliance engine to take near real-time actions
- Location tracking and geofencing
- Dashboards and alerts

Key benefits to Mobile Device Management MaaS360:

- **Enables flexible working** - mobilise content and files to stay productive at any time, on any device and from anywhere
- **Easy to set up** - quick set up with full visibility of all devices
- **Compliant** - helps you to safeguard and contain business data
- **Convenient** - centrally manage integration across all systems from email and Wi-Fi to application management and VPN profiles
- **Secure management** - set security policies and enforce them with automated compliance actions like requiring a device passcode and blocking a compromised device
- **Analytics** - complete reporting to track, diagnose and resolve device and user issues

How you will benefit:

- Enhance your essential business security solutions
- Gain monthly reports
- Allows you to focus on business growth objectives rather than daily IT issues
- Ensure your brands are protected by using this industry leading secure and robust system
- Assistance with GDPR and MiFID II initiatives – encryption, secure data storage, auditing and threat management

Breakdown of benefits:

Device - encryption and passcodes; jailbreak/root detection; locate, lock, wipe

Applications - blacklist/whitelist mobile apps; wrapping and compliance rules; remote wipe of managed apps

Web - define URL filters and categories; allow access to intranet sites; disable native/3rd party browsers

Email - auto-quarantine/access approval; contain emails and attachments; remote wiping of work email

Documents - password authentication; restrict copy, paste, and share; remote wiping of work files

Network - configure Wi-Fi and VPN profiles; certificate delivery and authentication; dynamic policy based on SSID
